Wednesday Colloquium

Scientific Colloquium and Therapy Seminar

winter semester 2024

Universitätsklinikum
Tübingen

Greeting

Dear Colleagues, dear Ladies and Gentlemen,
dear students, dear all,

We would like to invite you to join the Wednesday Colloquium of the Hertie Center for Neurology at the University Hospital Tübingen. This semester, the Wednesday Colloquium will again take place as a hybrid event, with some exceptions for internal conferences. Where possible, we offer the event at lunchtime for a family friendly approach. The program of this traditional event of the University Department of Neurology in cooperation with the Hertie Institute for Clinical Brain Research, the Center for Integrative Neuroscience and the Neuroscience Campus Tübingen will again cover a wide range of current topics in the field of neurology and neuroscience this semester: We expect exciting lectures from the fields of neurology, therapy and basic scientific research. We will take a look at current developments in diagnostics and therapies for neurological diseases. Our aim is to offer insights into the state of the art in Neurology, and discuss clinical and scientific challenges to bring the clinical and research communities together. The clinical case conferences and video challenge will be an important part of the event series. We therefore invite everyone to get in touch with us with your suggestion for topics, speakers and cases.

We look forward to see you at MiKo!

Dr. Natalie Winter & Dr. Julia Fitzgerald
